Re. Woodley Plantation Site Railroad Spur Construction Estimate  
CSRS Job No. 212161.017

Dear Mr. Cavanaugh:

A proposed cost estimate is outlined below for the construction of a railroad spur to access the Woodley Plantation Site in Pointe Coupee Parish, Louisiana. The proposed rail spur will connect directly to an existing Union Pacific Rail Line, which is adjacent to the west property boundary of the Woodley Plantation site. The construction cost of a railroad spur, which includes labor, materials (switches, frogs, ballast, and track), and fill is estimated to be \$300 per linear foot (L.F). The total track length of the proposed spur is approximately 3,700 L.F yielding a total estimated construction cost of \$1,110,000.

Please note this estimate does not include engineering, environmental impacts, or operation and maintenance costs. This cost estimate was prepared with the best information available at the time of certification. The actual costs can vary based on the availability of material, site conditions and labor availability. This plan can be executed within a reasonable timetable of 180 days or less based on preliminary engineering judgment and Union Pacific Railroad construction guidelines.

Thank you for the opportunity to assist you in this project. Should you have any questions or require additional information, feel free to contact me.

Sincerely,

CSRS, Inc.

Taylor M. Gravois, PE, PLS
